Vayego® Forte

INSECTICIDE

ACTIVE CONSTITUENT: 480 g/L TETRANILIPROLE

GROUP 23 INSECTICIDE

For the control of banana weevil borer in bananas as specified in the DIRECTIONS FOR USE table

DIRECTIONS FOR USE

CROP	PEST	RATE	CRITICAL COMMENTS
Banana – Cavendish, Lady Finger	Banana weevil borer	0.8 mL/stool Inject undiluted or diluted with water up to a total application volume of 1 - 2 mL/stool	<p>Select the best follower for treatment. Do not treat any follower more than once. Do not treat bunched plants. Treatment can occur at any time within 3 months after harvest of the mother plant or nurse-suckering. At treatment the follower plant should be at the required stage at least 3 months prior to bell emergence. DO NOT treat after bell emergence.</p> <p>To limit the risk of plant damage from injection, inject only those followers that are at least 1.0 m tall to the throat of the plant. Under certain conditions stem splitting will occur. This has been found to be most pronounced in conditions that favour rapid plant growth e.g. in the period November to February.</p> <p>Injection should occur 15 cm from the base of the plant at an off-centre, downward angle to a depth of 5 to 10 cm. Do not inject into the centre of the plant as this may result in plant death.</p> <p>Irrigation or moderate to heavy or prolonged periods of rainfall may saturate the internal structure of the pseudostem, leading to “run-out” from injection holes. Allow sufficient time following irrigation and rainfall events before application to minimise such ‘run-out’.</p> <p><u>Resistance Management</u> Vayego should be used as part of an integrated pest management approach which should include the use of other measures for control of banana weevil borer such as back butt injections.</p>

NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

WITHHOLDING PERIODS

Bananas:

Harvest: NOT REQUIRED WHEN USED AS DIRECTED

**GENERAL INSTRUCTIONS****Mixing**

Shake the container well before using. If diluting in water (refer rate column in DIRECTIONS FOR USE table) add the required quantity of Vayego Forte to water in the tank while stirring or with agitators in motion. Vayego Forte should be applied as soon after mixing as possible.

Application

For all application instructions, refer to the Critical Comments in the DIRECTIONS FOR USE table.

INSECTICIDE RESISTANCE WARNING

GROUP	28	INSECTICIDE
--------------	-----------	--------------------

For insecticide resistance management Vayego Forte Insecticide is a Group 28 insecticide.

Some naturally occurring insect biotypes resistant to Vayego Forte and other Group 28 insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Vayego Forte or other Group 28 insecticides are used repeatedly. The effectiveness of Vayego Forte on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, Bayer CropScience Pty Ltd accepts no liability for any losses that may result from the failure of Vayego Forte to control resistant insects.

Resistance Management Strategy

Vayego Forte may be subject to specific resistance management strategies. For further information contact your local supplier, Bayer Crop Science representative, local agricultural department agronomist or visit www.croplife.org.au.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Very toxic to aquatic life. DO NOT contaminate wetlands or watercourses with the chemical or used containers.

PROTECTION OF HONEY BEES AND OTHER INSECT POLLINATORS

Highly toxic to bees. Tetraniliprole has a systemic action. However, the use of this product as directed is not expected to have adverse effects on bees.

STORAGE AND DISPOSAL

Store in the closed, original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight.

Triple rinse container before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging for appropriate disposal to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. Do not burn empty containers or product. Do not re-use empty container for any other purpose.

SAFETY DIRECTIONS

May irritate the eyes. Avoid contact with eyes. When opening the container and preparing product for use and using the product, wear cotton overalls (or equivalent clothing) buttoned to the neck and wrists and elbow-length chemical resistant gloves. Wash hands after use. After each day's use, wash gloves and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre (telephone 13 11 26).

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet, which can be obtained from www.crop.bayer.com.au.

EXCLUSION OF LIABILITY

This product must be used strictly as directed, and in accordance with all instructions appearing on the label and in other reference material. So far as it is lawfully able to do so, Bayer CropScience Pty Ltd accepts no liability or responsibility for loss or damage arising from failure to follow such directions and instructions.

Vayego® is a Registered Trademark of the Bayer Group.
