Inteco™

SEED TREATMENT ADDITIVE

**Composition: 80% soybean oil refining raffinate
20% surfactants, emulsion agents, various**

An additive for seed film coating to improve the adhesion of seed treatments, and to reduce dust

MODE OF ACTION

Inteco is an oily, water-miscible solution that is applied during the process of seed treatment. The physicochemical properties of Inteco optimize the attachment of the active ingredient to the seed. Treated seed shows improved handling due to a smoother surface and also reduces dust caused by abrasion during seed transport and transfer.

APPLICATION

Shake well before use. Inteco is applied in combination with the chosen cereal seed treatment. When tank mixing insecticidal and/or fungicidal seed treatment into a slurry with water, ensure Inteco is added last while maintaining constant stirring. By thorough stirring, a homogenous mixture is ensured.

MISCIBILITY

To optimize the seed treatment process, it may be useful to optimize the application rate with water. In practice 300-600 millilitres of seed treatment mixture (product + water) per 100 kilogram of seed will achieve good coverage of the grain. Depending on the cereal seed and type of application equipment, the amount of water (or total slurry volume) can be adjusted accordingly.

RATE

Inteco should be applied at 30 mL/100 kg seed in combination with the chosen cereal seed treatment.

COMPATIBILITY

Inteco at the recommended dose (30 mL/100 kg seed) has no influence on the germination or vigour of the seed. The insecticidal and/or fungicidal effectiveness of the mixing partner is also not influenced. Inteco is designed for use with water based seed treatment formulations. For further advice on compatibility with other seed treatment products please contact your Bayer Crop Science representative.

STORAGE AND DISPOSAL

Keep out of reach of children. Store in the closed, original container in a cool, well ventilated area. Do not store for prolonged periods in direct sunlight.

Triple or preferably pressure rinse containers before disposal. Add rinsings to the seed treatment mixing tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.

If not recycling break, crush or puncture and deliver empty container to an approved waste management facility. If an approved facility is not available, bury the empty container 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. Do not burn empty containers or product. Do not re-use empty container for any other purpose.

SAFETY DIRECTIONS

Avoid contact with eyes and skin. If in eyes, rinse immediately with water. If on skin, wash with soap and water.

When opening the container and using the product wear cotton overalls buttoned to the neck and wrist (or equivalent clothing) and gloves (PVC or nitrile). Wash hands after use. After each day's use wash contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26. Rinse mouth with water. Do NOT induce vomiting.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet, which can be obtained from www.crop.bayer.com.au.

EXCLUSION OF LIABILITY

This product must be used strictly as directed, and in accordance with all instructions appearing on the label and in other reference material. So far as it is lawfully able to do so, Bayer CropScience Pty Ltd accepts no liability or responsibility for loss or damage arising from failure to follow such directions and instructions.
