

**Alion®**

# Longer lasting pre-emergent weed control.

## KEY BENEFITS

- //// Long lasting weed control
- //// Broad range of grass and broadleaf weeds
- //// Low dose rate
- //// Flexible application window

## TARGET CROPS AND USE PATTERNS

- //// Almonds
- //// Citrus
- //// Grapes
- //// Fence lines\*

## **Alion® contains new herbicide technology for agriculture that provides highly effective pre-emergent control of a wide range of grass and broadleaf weeds.**

Alion offers long-term pre-emergence control, simplifying weed control in almonds, grapes, citrus & fence lines\*, allowing more time to focus on other important management tasks.

### **/// HOW DOES IT WORK?**

- Moisture is required to incorporate Alion into the soil profile
- Apply to moist soil, or to dry soils that will receive rainfall or irrigation (not flood) within 3 weeks
  - Dry soil conditions following the application of Alion may result in reduced weed control.

#### **USE GUIDELINES**

- ✓ Moist soil
- ✓ Dry soil – rainfall or irrigation within 3 weeks
- ✗ Dry soil – no follow up rainfall or irrigation

# Trials in grapes and citrus

## /// GRAPE TRIAL: MOONAMBEL, VIC. HD20AUSH1VE02

85 days after application

## /// CITRUS TRIAL: HARVEY, WA.

63 days after application

# Fence line trial

## /// KYBYBOLITE, SOUTH AUSTRALIA\*\* HP22AUSAF14

\*\*Trial area has high level of Group 9 resistant Annual Ryegrass

335 days after application

## Get in touch and get informed.

Bayer has conducted hundreds of trials with Alion across a range of target crops all around the world. In Australia, Bayer has completed more than 50 replicated efficacy, residue, compatibility and crop safety trials.
