

# Versatile disease protection for wheat, barley and oats.

The versatility of Baytan® T helps get crops off to a good start. It is used for the control of bunt, flag smut and loose smut and suppression of seedling stripe rust and speckled leaf blotch in wheat, for the control of covered smut, loose smut and powdery mildew and suppression of leaf scald in barley, and for control of loose and covered smut of oats. Treated seed is also protected against insect pests of stored grain.

## At a glance

<b>Product Type</b>	Fungicide and grain protectant
<b>Active Ingredient(s)</b>	150 g/L triadimenol and 4 g/L triflumuron
<b>Formulation Type</b>	Flowable concentrate for seed treatment
<b>Pack Size(s)</b>	10 L, 100 L
<b>Chemical Group</b>	Triazole, benzoylurea
<b>Grouping</b>	3, 15A
<b>Mode of Action</b>	Inhibitor of sterol biosynthesis
<b>Application Rate</b>	100 mL or 150 mL/100 kg
<b>Dilution Rate</b>	Apply in total volume of 400 - 600 mL/100 kg seed

## Compatibility
