

**Gaucho<sup>®</sup>**

**The canola is  
always better on  
the GAUCHO side.**

From the moment you sow and throughout germination and establishment, you can rely on the performance of GAUCHO<sup>®</sup> Insecticidal Seed Treatment to optimise the productivity of your canola crop. GAUCHO protects each and every seed and seedling from redlegged earth mites, blue oat mites and aphids, and because it reduces the need to spray, earthworms and other beneficial species can flourish. You'll end up with more productive canola sooner, and because GAUCHO is applied professionally and delivered on seed you'll also benefit from exceptional convenience and peace of mind. Simply order GAUCHO when you order your seed. And then watch your crop perform to its optimum.
