

InVigor[®] T 4510

An exciting new benchmark for early-mid TT hybrids

Our first InVigor[®] TT is a significant breakthrough in the TT hybrid canola segment. Its exceptional vigour and yields – producing very rewarding margins – have made a big impression on the WA growers who have hosted replicated trials under a wide range of growing conditions as part of an extensive evaluation program since 2013. This outstanding new variety offers a great upgrade option for anyone already growing TT hybrids, and a strong financial incentive for OP growers to make the switch.

- Higher yields, oil content and gross margin than well-established TT hybrids.
- Great financial returns vs farmer-retained TTs.
- Ideally suited to areas with low-medium or medium average rainfall, offering strong yields in a dry finish.
- Also a good option in higher rainfall areas, with in-crop blackleg protection.

What sets InVigor T 4510 apart?

The new InVigor brand stands for significant practical innovation in canola breeding, and that doesn't necessarily always involve introducing new traits.

After a few years in which the breeding of new TT hybrids was only producing marginal increases in yield and flexibility, **InVigor T 4510 is a huge advance** – not just in peak performance, but also in reliability across a wide range of conditions.

What's behind the name?

Variety description

Herbicide tolerance:	Triazine Tolerant
Blackleg rating:	MR*
Alternative to: TT Hybrids TT Open Pollinated	Hyola [®] 559, 44T02, SF Turbine Stingray, Bonito, Gem
Flowering maturity:	Early-Mid
Vigour:	Excellent
Oil:	Good
Plant height:	Medium
Lodging resistance:	High
PodGuard[®]:	No

*Bayer estimate when treated with Jockey[®] Stayer[®].

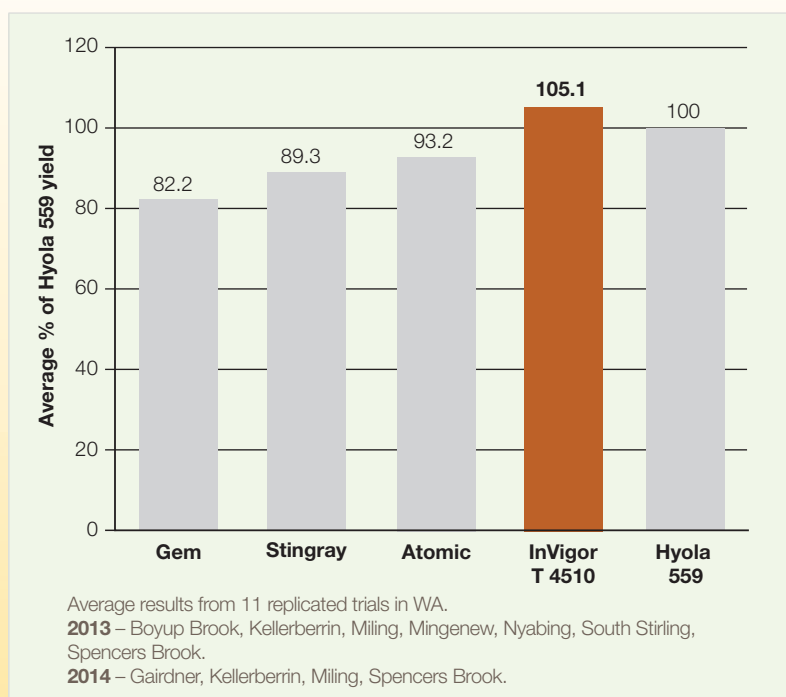

Seed treatments

Jockey Stayer[®] Vital early-season blackleg suppression.

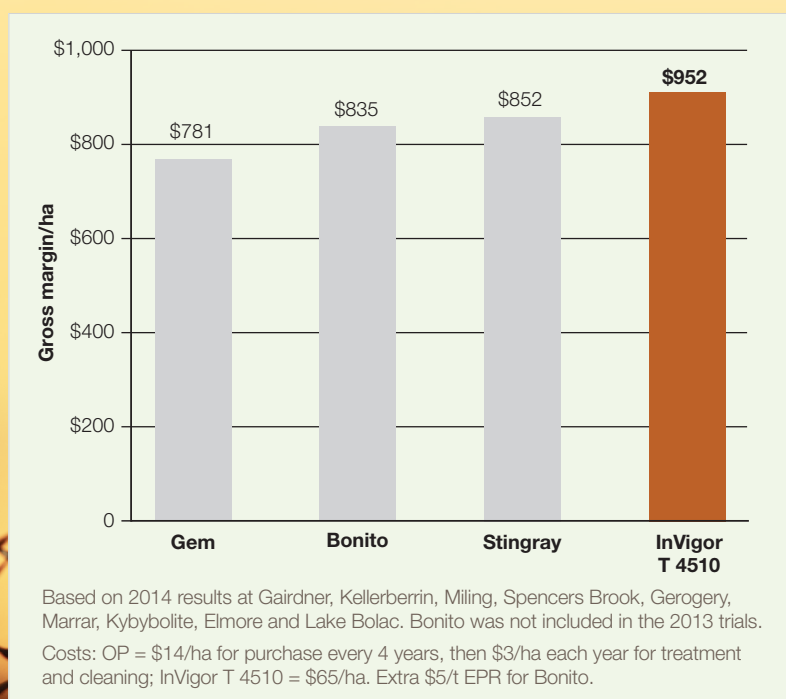

PONCHO PLUS[®] Systemic broad-spectrum control of wireworm, cutworm, aphids, redlegged earth mites and blue oat mites, and suppression of lucerne fleas.

Higher average yields than Hyola 559 and other key TTs

These graphs show the results of WA trials from 2013 and 2014 in which T 4510 was consistently tested against a group of well-established OP varieties as well as Hyola 559. Individual trials in 2015 produced equally impressive results against Bonito and Stingray.

Much more profit than OP alternatives

>12% extra return on investment vs Bonito
