

The proven winner against fungal diseases in wheat, barley and canola.

Jockey Stayer offers exceptional disease protection in canola, wheat and barley.

It is the industry standard for protecting wheat crops against the root disease take-all, and also controls a range of foliar and head diseases in wheat and barley.

Jockey Stayer also provides vital early-season protection against blackleg in canola.

At a glance

Product Type	Fungicide
Active Ingredient(s)	167 g/L fluquinconazole
Formulation Type	Flowable concentrate for seed treatment
Pack Size(s)	10 L, 100 L
Chemical Group	Triazole
Grouping	3
Mode of Action	Inhibitor of sterol biosynthesis
Application Rates	Wheat 300 or 450 mL/100 kg, Barley 300 mL/100 kg + 100 mL /100 kg Raxil T, Canola 2,000 mL/100 kg
Dilution Rate	Wheat/Barley – Do not make total volume more than 600 mL/100 kg Canola – Do not add water for canola

Compatibility

Jockey Stayer Seed Treatment Fungicide may be applied with Gaucho® 600 Flowable Seed Dressing Insecticide.

WHEAT ONLY: Jockey Stayer is compatible with Vincit® C, Vitaflo® C (up to 1.25 L/tonne) and Raxil® T seed treatments.

BARLEY ONLY: Jockey Stayer is compatible with Raxil T and Hombre® Ultra seed treatments.

For information on the compatibility of Jockey® Stayer® with other products, contact your local Bayer CropScience representative.

Jockey® Stayer®

Key features

- Broad spectrum systemic disease protection on the seed, on foliage and on plant roots.
- Up to 6 weeks control of stripe rust and up to 4 weeks control of leaf rust in wheat after sowing, with useful suppression thereafter.
- Up to 6 weeks control of barley leaf scald and up to 5 weeks control of powdery mildew in barley after sowing, with useful suppression thereafter.
- Suppression of take-all in wheat and blackleg in canola.
- Extended uptake for long lasting protection of the plant due to low water solubility of the active ingredient.
- User friendly formulation that's easy to apply and has excellent seed coverage.

Key benefits to grower

The systemic nature of Jockey Stayer seed treatment ensures that each individual plant is protected. Experience has shown that using Jockey Stayer can reduce or even eliminate the need for a post-emergent fungicide, saving growers time and money.

Withholding periods

Harvest

Wheat, Barley and Canola:
Not required when used as directed.

Grazing

Wheat and Barley:
Do not graze within 6 weeks of sowing.
Do not cut for stock food within 12 weeks of sowing.

Canola:

Do not graze plants grown from treated seed, or cut for stock food within 8 weeks of sowing.

Livestock producing milk for human consumption:

Do not graze within 12 weeks of sowing.
