Jockey® Stayer® seed treatment in canola.

For a great start, and a winning finish.

Jockey Stayer is a quinazoline-triazole fungicide seed treatment and is the benchmark for vital early season blackleg management in canola. Plants that have been treated with Jockey Stayer show reduced leaf infection, reduced plant lodging, increased plant survival and increased yield.

Jockey Stayer offers cost effective blackleg management compared to fertiliser treatments, with the added flexibility of being a seed treatment.

The high quality formulation sticks to seed, not treating equipment, making it easier to apply than some other seed treatment formulations, and ensures that the product is on the seed where it is needed. Professional application ensures each and every seed is protected.

Blackleg is the most devastating disease for canola in Australia and is estimated to cause the canola industry losses of $76.6 million each year*.

Canola - blackleg suppression

Key Features

- Vital early season blackleg suppression in canola.
- Helps to maximise canola yield in situations with moderate to high blackleg risk.
- Cost effective blackleg management compared to fertiliser treatments.
- Field trials demonstrate Jockey Stayer is a proven winner for a high level of blackleg suppression in early developing canola compared to Maxim® XL.
- Shows reduced plant lodging compared to Maxim XL.
- Shows improved plant biomass and yield compared to Maxim XL.
- Excellent crop safety.
- Use in conjunction with Prosaro® Foliar Fungicide for the best seasonal blackleg management.

Average plant lodging

![Average plant lodging chart]

Trial ID: 10/VB01, 10/NW03
Cobbler variety which may be prone to lodging.
Application rates: Jockey Stayer 2 L/100 kg, Maxim XL 400 mL/100 kg

Average blackleg leaf infection

![Average blackleg leaf infection chart]

Trial ID: 10/VB01, 10/NW03
Application rates: Jockey Stayer 2 L/100 kg, Maxim XL 400 mL/100 kg

Canola yield

![Canola yield chart]

Trials ID: 10/ND04, Wallenbeen, NSW
Application rates: Jockey Stayer 2 L/100 kg, Maxim XL 400 mL/100 kg

Average biomass (0-100 visual rating)

![Average biomass chart]

Trials ID: 10/VB01, 10/NW03, 10/ND04, 10/VA09
Application rates: Jockey Stayer 2 L/100 kg, Maxim XL 400 mL/100 kg
