

When it comes to managing Botrytis there is no substitute for real expertise.

TELDOR

SCALA

rovral

Botrytis outbreaks have a devastating effect on fruit quality – and your bottom line. Effective control requires a preventative strategy that includes the use of high efficacy fungicides combined with expert advice from the company that understands and invests in the viticulture industry.

Our fungicides Teldor®, Scala® and Rovral® have proven to be key components for the effective control of botrytis within a sustainable resistance management strategy.

Get all the support and the right professional advice from the people at Bayer CropScience – where commitment to research and development continues to provide advances in crop protection for your industry.

For further information on the Bayer CropScience viticulture range contact your local area manager, your nearest reseller, or call our toll free Technical Enquiries line on **1800 804 479**.
