

# A new level of pest control in tree crops.

**Protect pome fruit, stone fruit,  
almonds and macadamias.**

## **KEY BENEFITS**

- //// Strong against listed moths, weevils and beetles
- //// Proven activity on all life stages
- //// Stops feeding damage quickly with systemic action and long residual efficacy
- //// Soft on key beneficial insects, including beneficial mites\*
- //// Short withholding period

\*When used as directed.

## Vayego<sup>®</sup> in high value tree crops.

The next step in your pest management program in pome fruit, stone fruit and almonds has arrived.

Vayego contains tetraniliprole, a new active ingredient developed by Bayer.

Both fast acting and long lasting, it delivers breakthrough control of key insect pests in high-value tree crops.

### /// WHAT YOU NEED TO KNOW

Australia is one of the first countries in the World to register Vayego 200SC. Vayego is new and unique chemistry within the group 28 diamide class.

Vayego has excellent selectivity, controlling a range of moth, beetle, weevil and fly pest species targeting multiple life stages, while being soft on many beneficial insects\*.

Once applied Vayego is systemic through the xylem and translaminar providing optimal protection. After ingestion Vayego causes rapid feeding cessation minimising fruit and nut damage.

Vayego is a highly versatile insecticide. The easy-to-use liquid formulation is widely compatible, rainfast and maintains performance in a wide range of conditions.

# Vayego targets multiple tree crop pests.

## /// POME FRUIT

---

Codling moth, light brown apple moth, apple weevil, garden weevil, Fuller's rose weevil.

## /// STONE FRUIT

---

Oriental fruit moth, apple weevil, garden weevil, Fuller's rose weevil, Mediterranean fruit fly, suppression of carpophilus beetle.

## /// ALMONDS

---

Carpophilus beetle  
(including near *dimidiatus*)

## /// MACADAMIAS

---

Sigastus weevil  
(macadamia seed weevil)

## /// IPM PROFILE

Vayego has been shown to have minimal impact on key beneficial insects; having been assessed in over 160 tests in both Europe and Australia.

## Get in touch and get informed.

Bayer has conducted hundreds of trials with Vayego across a range of target crops all around the world.

In Australia, Bayer has completed more than 70 replicated efficacy, residue and compatibility trials.
